

Auburn Bearing & Manufacturing Introduces INA B1 Interchange

Macedon, New York, July 25, 2018 -- Auburn Bearing & Manufacturing, a leading manufacturer of ball/roller thrust bearings and custom machined parts in Upstate New York, is pleased to announce the immediate availability of an interchange for the INA B1 Banded Thrust Ball Bearing.

This popular interchange is manufactured using materials made in the USA and is currently in stock at our facility located in the Finger Lakes Region of New York. The Auburn Bearing & Manufacturing part number for this interchange is 101-765 [.503 (1/2) x 1.219 (1-7/32) x .625 (5/8)] or you may simply refer to it as a B1.

About Auburn Bearing & Manufacturing

Auburn Bearing & Manufacturing was established in 1898 and is one of the oldest continuously operating thrust ball bearing manufacturers in the United States. We're committed to the same things that have established our reputation as it stands today: personalized service, on-time delivery, and quality products that are proudly made in the USA. ABM specializes in the manufacture of standard, custom, obsolete, and hard-to-find ball and roller thrust bearings as well as custom machining for low- to mid-volume jobs.

Auburn Bearing & Manufacturing also manufactures an exclusive line of thrust bearings that incorporate a "V" groove raceway designed specifically to reduce rolling friction. The Auburn styles that incorporate the "V" groove design have the added advantage of being able to carry radial loads equal to 25% of their thrust load capacity.
