

Auburn Bearing & MANUFACTURING

Made in the USA since 1898

Auburn Bearing Company Profile

Auburn Bearing & Manufacturing, founded in 1898, is considered to be one of the oldest continuously operating thrust bearing manufacturers in the United States. In addition to our standard line of thrust bearings, we specialize in the design and manufacture of special/custom bearing assemblies and precision machined components in low- to mid- volume production runs.

Thrust Ball & Roller Bearings

ABM offers a complete line of standard thrust bearings, many of which feature Auburn's exclusive V-groove raceway design, which was designed specifically for the purpose of reducing rolling friction. The Auburn bearing styles that incorporate this raceway have the added advantage of being able to carry radial loads equal to 25% of their thrust load capacity.

Custom Bearings & Components

ABM specializes in the design, development, and manufacture of custom, hard-to-find, discontinued and obsolete bearings in low- to mid- volume for a wide range of industries and applications. We can customize various aspects of a bearing, including its size, design, features, and materials.

Custom Manufacturing & Machined Parts

ABM is also capable of producing a wide range of special, made-to-order machined parts and components to solve your problems. Our diverse custom manufacturing capabilities include automatic and manual CNC turning, CNC milling, and CNC grinding. Additionally, we offer lapping, superfinishing, automatic saw cutting, reverse engineering, and much more.

The Auburn Advantage

With over 120 years' experience, we are committed to providing...

- Personalized service
- Short lead times
- On-time delivery
- Trusted expertise
- Innovative solutions
- High precision capabilities
- Made in America

Industries & Applications

- Aerospace
- Defense
- Oil & Gas
- Marine
- Industrial
- Medical
- Food Processing
- Agriculture
- Off-Highway
- And more
